What are the risks of investing?

Risk indicator for the Mercer Ethical Leaders Conservative Fund²:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

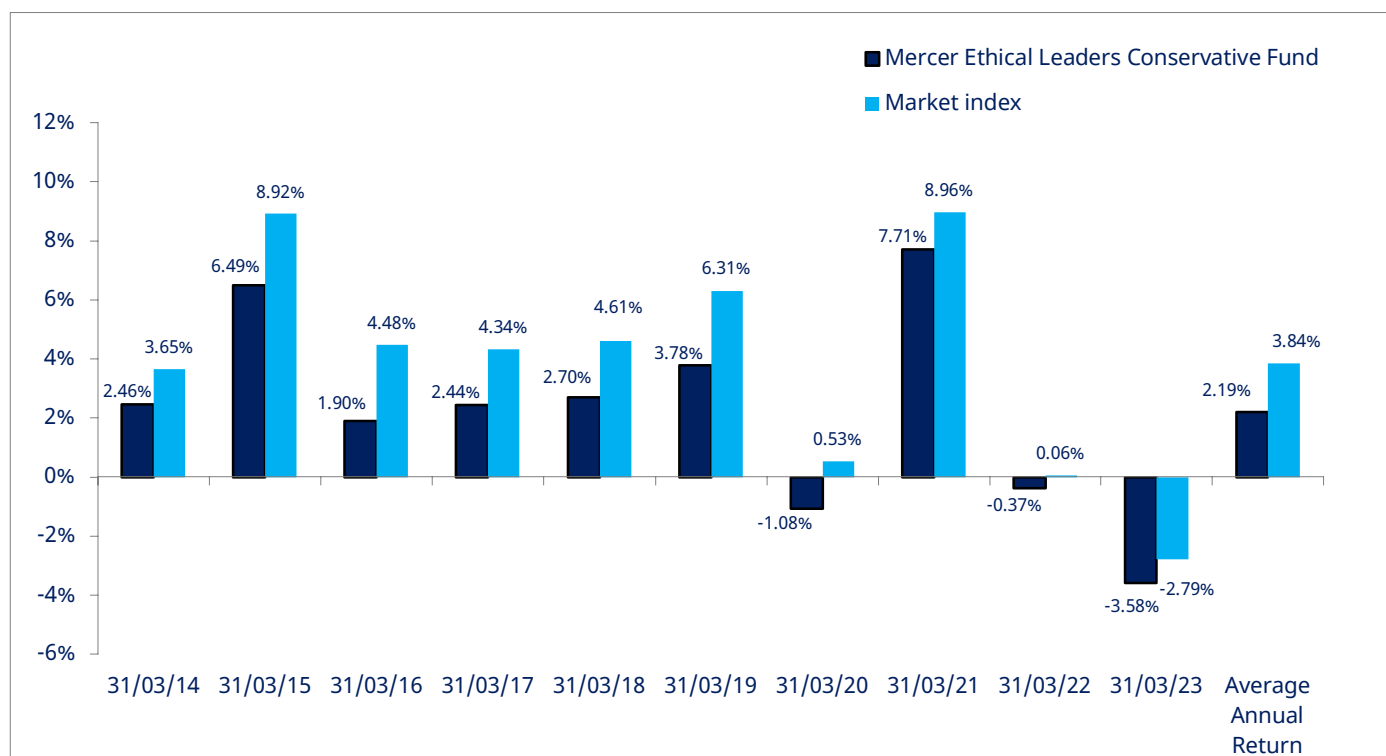

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Notes

1. On 3rd March 2023, Mercer (N.Z.) Ltd became the manager of the fund. The previous manager was Macquarie Asset Management Public Investments (NZ) Limited. From 3rd March 2023, the Macquarie Ethical Leaders Conservative Fund is called the Mercer Ethical Leaders Conservative Fund.
2. In previous quarters, the risk indicator has been calculated based on the weekly returns of the Fund. The basis of the risk indicator has changed to the monthly returns to be consistent with other investment options managed by Mercer (N.Z.) Ltd.
3. These returns are for the periods ending 31 March 2023.
4. The bar graph shows fund returns after the deduction of fees and tax, however, the market index returns are shown before any fees or tax are deducted.
5. GST is currently charged at 15% on 10% of the management fee in accordance with the non-binding IRD agreement with the Financial Services Council of New Zealand Incorporated on behalf of the funds management industry. GST on management fees is currently under review and therefore this percentage may change in the future.
6. The returns and tax calculations used in this example are the actual fund returns and tax charges (or rebates) for the year ended 31 March 2023. Net of tax returns can be more than gross of tax returns where, due to the fund's tax position, it receives a tax rebate rather than paying tax.
