

FUND UPDATE

FOR THE QUARTER ENDED 31 MARCH 2022

MACQUARIE

Macquarie Investment Funds

Macquarie Global Income Opportunities Fund¹

This fund update was first made publicly available on: 03 May 2022

What is the purpose of this update?

This document tells you how the Macquarie Global Income Opportunities Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Macquarie Asset Management Public Investments (NZ) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund is a well-diversified portfolio of highly rated global fixed interest securities. At the total portfolio level the fund will have a shorter maturity than most traditional fixed interest funds, with an emphasis on minimising capital loss.

The fund invests in a wide range of Australasian and global investment grade floating and fixed rate instruments, asset-backed securities, and cash via investment in the Macquarie Global Income Opportunities Fund, a fund managed by Macquarie Investment Management Australia Limited. The Macquarie Global Income Opportunities Fund may also have opportunistic exposure to other fixed income sectors and instruments such as high yield and emerging markets debt as well as other fixed income instruments. Interest rate risk will generally be hedged through the use of derivatives such as swaps and futures.

Environmental, Social and Governance characteristics are integrated into the underlying investment manager's investment process.

The fund targets a position of being fully hedged to the New Zealand dollar.

The performance objective of the fund is to provide a Gross Return (see note 2 below) above the return of the Bloomberg NZBond Bank Bill Index on a rolling three-year basis.

Total value of the fund	NZ\$17,931,020
The date the fund started	11 May 2012

What are the risks of investing?

Risk indicator for the Macquarie Global Income Opportunities Fund (see note 6 below):

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period to 31 March 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

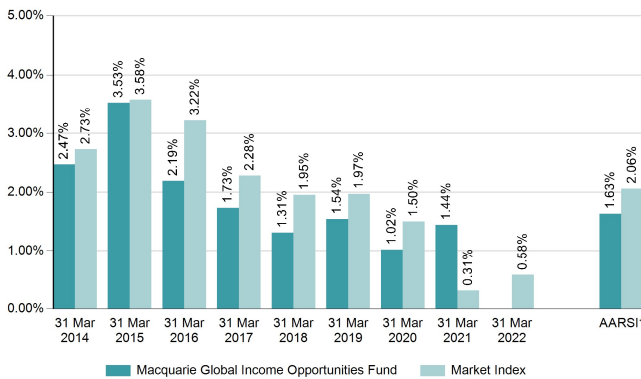

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return³ (after deductions for charges and tax)	0.63%	-2.10%
Annual return³ (after deductions for charges but before tax)	0.88%	-2.90%
Market index annual return³ (reflects no deduction for charges and tax)	1.26%	0.58%

The market index annual return is based on the Bloomberg NZBond Bank Bill Index. Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

Annual Return Graph⁴

* Average Annual Return Since Inception to 31 March 2022

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2022.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Macquarie Global Income Opportunities Fund are charged fund charges. In the year to 31 March 2022 these were:

	% of net asset value
Total fund charges	0.85%
Which are made up of:	
Total management and administration charges	0.85%
Including:	
Manager's basic fee (excluding GST)	0.75%
Other management and administration charges (including GST)	0.10%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Macquarie Investment Funds Cash and Fixed Interest Funds on the offer register at www.companiesoffice.govt.nz/disclose for more information about those fees.

Example of how this applies to an investor⁵

Small differences in fees and charges can have a big impact on your investment over the long term.

Jeff had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jeff incurred a loss after fund charges were deducted of -\$290 (that is -2.90% of his initial \$10,000). This gives Jeff a total loss after tax of -\$210 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

International fixed interest (99.80%)
Cash and cash equivalents (0.20%)

Target investment mix

International fixed interest (100.00%)

Top 10 investments

Further information

You can also obtain this information, the PDS for the Macquarie Investment Funds Cash and Fixed Interest Funds, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose.

Notes

1. In March 2022, Macquarie Asset Management Holdings Pty Limited completed the acquisition of the AMP Capital Global Equities and Fixed Income business from AMP Group Holdings Limited. Prior to that acquisition, Macquarie Asset Management Public Investments (NZ) Limited was known as AMP Investment Management (N.Z.) Limited and the Macquarie Global Income Opportunities Fund was known as the AMP Capital Global Short Duration Fund.
2. Gross Return is the return before the deduction of tax, expenses and fees and assumes all income is reinvested.
3. These returns are for the periods ending 31 March 2022.
4. The bar chart shows fund returns after the deduction of fees and tax, however, the market index returns are shown before any fees or tax are deducted.
5. The returns and tax calculations used in this example are the actual fund returns and tax charges (or rebates) for the year ended 31 March 2021. Net of tax returns can be more than gross of tax returns where, due to the fund's tax position, it receives a tax rebate rather than paying tax.

6. In December 2021, the fund's strategy changed whereby the fund's exposure to international fixed interest is now achieved through an investment in the Macquarie Global Income Opportunities Fund. The risk indicator above is based on the returns data for the Macquarie Global Income Opportunities Fund for the last five years. The risk indicator for the Global Short Duration Fund is based on a combination of the Macquarie Global Income Opportunities Fund return up until the 30 November 2021 and then actual Fund returns from 1 December 2021.
